

## Electronic Transfer of Care Around Medicines (TCAM)

To continue your care after you have been discharged from our hospital, we can provide details of your treatment and medications to your GP and local Community Pharmacy. This ensures that all medical professionals are informed on any changes to your medicines.

This information is sent through a safe and secure electronic pathway, which can only be viewed by medical professionals who are involved with your ongoing treatment and care after discharge.

The information we send will include details of

- any changes which have been made to your regular medicines
- any new medications which have been prescribed or started in hospital
- any medicines which may have been stopped whilst in hospital

After the information has been received by your GP and Community Pharmacy, they will update their records so that they are informed of your latest medicines and treatment plan.

### Community Pharmacy

When you have been discharged from hospital, please contact your local pharmacy (either by phone or in person) to discuss any changes to your medication which have been made. They will be able to discuss the options available to you for reordering and managing your medicines.

Your pharmacist will also discuss the medicines which you have been prescribed to take and can help with any questions or concerns you may have.

### Help and Support

If you have any questions or would like any further information on this scheme, please ask a member of our pharmacy team.

After discharge from our hospital, please contact your local community pharmacy.
